Course: Cloud-Native Architecture & Engineering
Moses:
https://moseskonto.tu-berlin.de/moses/modultransfersystem/bolognamodule/beschreibung/anzeigen.html?number=40103&version=11
Semester: Summer 2023
Exam Type: Oral
Maximum Points: 20

The exam was conducted group by group basis. In the first part, Professor Tai asked questions individually, and in the later part asked questions which were free for all.

No questions were asked directly from slides/classes.

Prof Tai and another researcher studied the submitted design document thoroughly. Questions were based on design documents and were pretty abstract. Defending the design document and discussing the alternative approach (if available) was the goal of the oral exam.

One group reported that they were asked one question from the guest lecture.
